Small effort. Great convenience.

Discover Ledinaire EcoSet for a simple upgrade from regular on-off lighting to an automated solution!

Here's how it works

Ledinaire EcoSet luminaire
with integrated wireless controls

External motion
and daylight detection sensor

Automated dimming
and switching

Here's what you'll get

Lower energy bills

Higher comfort

Easy installation

Introducing Philips Ledinaire EcoSet

A simple and reliable **solution** for offices and schools

The Ledinaire EcoSet panel with motion sensors will reduce electricity bills and ensure comfort through automatic dimming and switching.

High-quality energy-saving LED lighting:

- Easy to install and setup luminaires
- Motion and daylight detection
- Minimal maintenance

¹Energy savings: compared to regular Ledinaire on/off LED fixtures thanks to automatic dimming and motion detection.

Benefits for the installer

Simple installation thanks to completely wireless configuration of lights and sensors.

Quick assembly using a quick connector - installation like a regular luminaire.

Wireless connection of lighting and sensors.

Fast setup for dimming via “one-touch” approach

Enables automated dimming and switching of lights. Setup an office space with one touch approach.

Dip switches allow easy configuration of settings.

Easy to maintain, no batteries or upgrades

Apart from renowned quality of Philips Ledinaire luminaires, AC powered sensors remove the pain point of working with batteries. Simple solution requiring no upgrades.

A solution with excellent value

The best choice for customers who care about savings: Thanks to simple installation without the use of cabling and wireless, quick configuration, you have time for other projects.

Additionally, the customer saves thanks to automatic dimming, motion detection and adjustment to daylight intensity, which results in lower annual energy consumption.

Philips Ledinaire EcoSet – a new lighting system for offices and schools

- 1 Install the luminaires as you normally would – it's fast and easy thanks to the handy quick connector.

Make sure that the lighting plan will provide power independently for each group of lights.

- 2 Install sensors at desired locations.

Tip: Place sensors above desks for optimal presence detection. In areas with a lot of foot traffic, place sensors close to entrances and exits.

- 3 Set up the group with the remote control. Connect luminaires, sensor(s) and optionally a wall switch.

Done!

Ledinaire EcoSet panel specifications

| Specification | Ledinaire panel EcoSet |
|-----------------------------|---------------------------------------|
| Product name | RC075 345/840 ESW W60L60 OC EcoSet SC |
| 12NC | 911401877685 |
| Luminous flux | 3 400 |
| Dimensions | 595 mm x 595 mm |
| Safety cable | Yes, inside packaging (SC) |
| Efficacy | 120 lm/W |
| Wattage | 28 W |
| Lifetime | 75 000 h L70, 50 000 h L80 |
| UGR | <19 |
| CRI | >80 |
| CCT | 4 000 K |
| SDCM | <5 |
| Operating temperature range | -10°C < Ta < +35°C |

Ledinaire EcoSet sensor specifications

| Specification | Ledinaire office sensor EcoSet |
|-----------------------------|--|
| Product name | EXT2010 OCC DL PIR AC Sensor RS WH ESW |
| 12NC | 911401562943 |
| Sensor type | PIR & Daylight (motion and daylight sensor) |
| Technology | BLE mesh |
| Frequency | 2.4 GHz |
| Mounting | Recessed and wall-mounted |
| Mounting height | 2.5 – 5 m |
| Dimensions | Ø 94 mm x 42 mm |
| IP | IP20 |
| Lifetime | 50 000 h Ta25° |
| Power supply | 220-240Vac; 50/60Hz |
| Operating temperature range | -20°C < Ta < +50°C |
| Certificates | CE, CB, RED |

EcoSet wireless wall switch specifications

Quick start guide

Philips Ledinaire EcoSet

Exemplary office area

1. Prepare the setup for a group

1

Make sure that the lighting plan will provide power for each group of lights.

Independent power control for each group ensures a successful light setup.

2

Insert batteries in remote control and optional wall switch.

Remote: 2 × AA

Wall switch: 1 × CR2450

3

Optional:

Configure the settings via the dip switches on the back of the sensor.

Please refer to the mounting instructions of the sensor included in the box.

4

Install lights as per lighting plan.

You can turn on the lamps to test the electrical connection, but remember to turn off all lamps before the next step.

2. Create a group of lights

| | | | | |
|---|---|---|---|---|
| <p>1</p>  <p>1. Turn the lights in the group off for 10 seconds. Make sure that no other lights are switched on.</p> <p>2. Turn the lights back on</p> <ul style="list-style-type: none"> ➤ The red LED in the sensor unit lights up to indicate that the sensor is being powered up. ➤ Wait until the sensor LED is turned off. This will take about 50 seconds. | <p>2</p>  <p>Create a new group</p>  <p>Press the above buttons on the remote control for 10 seconds.</p> <ul style="list-style-type: none"> ➤ The red LED on the remote will light up. ➤ The lights will dim quickly and return to 100% within 2 minutes. No need to wait, we can continue with the configuration. | <p>3</p>  <p>Add a sensor</p>  <p>Shortly press the above button on the sensor.</p> <ul style="list-style-type: none"> ➤ The LED on the sensor will blink for 1 minute while it searches for and connects to the group. <p>No need to wait, we can continue with the configuration.</p> | <p>4</p>  <p>Optional step: Add a wall switch</p>  <p>Press the above buttons on the wall switch for 10 seconds.</p> <ul style="list-style-type: none"> ➤ The wall switch will search for and connect to the group. | <p>5</p>  <p>Your group is ready when the red LED on the remote turns off. This will take 2 minutes.</p> <p>Follow the instructions for testing the lights on the next page.</p> |
|---|---|---|---|---|

Please complete these steps within 2 minutes, otherwise the setup will fail!

3. Test lights of the created group | 3 options

1

Or

2

Or

3

Test lights in the group

QUERY

Press the „Query“ button on the remote to make the current group blink once.

Test the wall switch

Press “ON/OFF” or “+/-” buttons to operate the lights.

Please note:

After operating the wall switch the **hold time is extended by 30 minutes**. Switch the light off and on again to be able to test the sensor immediately.

Test the sensor

Walk out of the room / sensor range.

➤ Lights will dim after hold time, and switch off after 15 mins.
